#### DARKLIGHT DESIGN HORA INSTALLATION INSTRUCTIONS

#### **DISCLAIMER**

- Only use power supplies which are certified according to the applicable IEC or 3C standards
- Check that the rating of the power supply matches that of the luminaire
- The maximum current rating must be taken into account
- The indicated typical voltage must not be used to select a constant voltage power supply. It is indented to be used to select a constant current power supply that is able to cover that typical voltage
- Take appropriate ESD measures. Avoid touching bare conductors
- LED luminaires or LED drivers should never be cleaned with chemical substances. LEDs can be damaged by contact with certain chemicals or chemical gasses
- The following substances have been proven to have a negative influence on LED performance, and must not be used in the direct environment of the LED luminaire:
  - Methyl acetate or ethyl acetate (i.e., nail polish remover)
  - Formaldehyde or butadiene (including Ashland PLIOBOND adhesive)
  - Loctite Sumo Glue
  - Gorilla Glue
  - Bleach, Bleach-containing cleaners, sprays
  - Loctite 384 adhesive
  - Loctite 7387 activator
- Remove insulation and/or provide sufficient ventilation so that the indicated maximum temperature is not surpassed
- Only connect the driver with the fitting only after the power is off. LEDs are susceptible to switching transients
- Respect polarity
- Don't test LED luminaires one by one on a power supply that is switched on

Do not clean the LED chip and reflector by hand or with a towel!
