

ATLAS

The combination of a brass hinge mechanism with a transparent hand-blown glass shade creates a constructive lamp with a poetic character. The lamp is designed with a construction that can be folded in and out. When folded inwards, the glass shade can easily be placed around it; when unfolding the hinge mechanism, the glass shade will rest on the construction and stays in position.

GENERAL INFORMATION

Design by Anton de Groof, 2015

A hand-blown glass shade held by an ingenious brass hinge mechanism.
Atlas comes in various sizes and colors.
