

### DISCLAIMER

Photometric files provided to us by the manufacturer are correct at time of first publishing.

As LEDs evolve at such a rapid pace it is not always possible to renew photometric files immediately, we do however strive to keep the figures quoted on our website up to date. Please always check wattage and lumen values against the figures quoted on the website.

Most lighting calculation softwares allow the user to amend the figures prior to running a calculation, if for whatever reason this is not possible please do not hesitate to get in touch and we will do our very best to help.
