

EGGY POP

Design: Guglielmo Berchicci

OPH
LIGHTING

Inspired by the world of insects and combined with his humoristic approach to the design process, the renowned Italian architect Guglielmo Berchicci has designed an original lighting collection based on a simple shape: the egg.

Eggy Pop emits a pleasant and glare-free light. It is made of PE, a strong, UV-resistant, and recyclable material.

The Eggy Pop collection fulfills many different lighting requirements in private homes as well as public environments - indoors and outside.

Eggy Pop In¹ / Out² / Up / Pendant³
