Super Spike

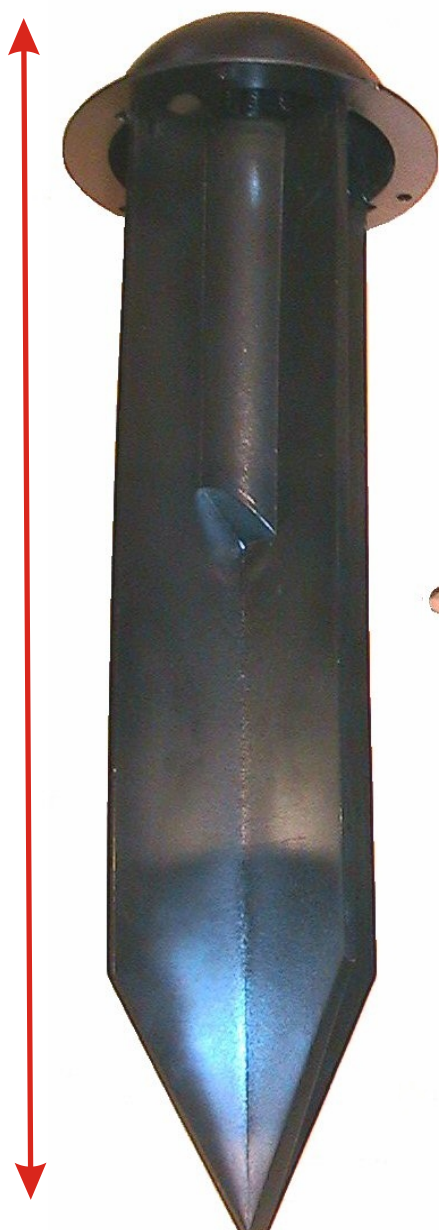

The Hunza Super Spike is a multi-purpose ground spike that adds significant stability in loose or sandy soil. It is designed for use with the NPS luminaire and any Hunza pole lite luminaire. It is supplied with two snap-in adaptors and is constructed from UV stable polycarbonate. There is sufficient space for a cable connection under the dome. Suitable for use with aluminium, copper or 316 stainless steel luminaires.

Now available in two lengths, 300mm and the new 150mm, giving you more choice.

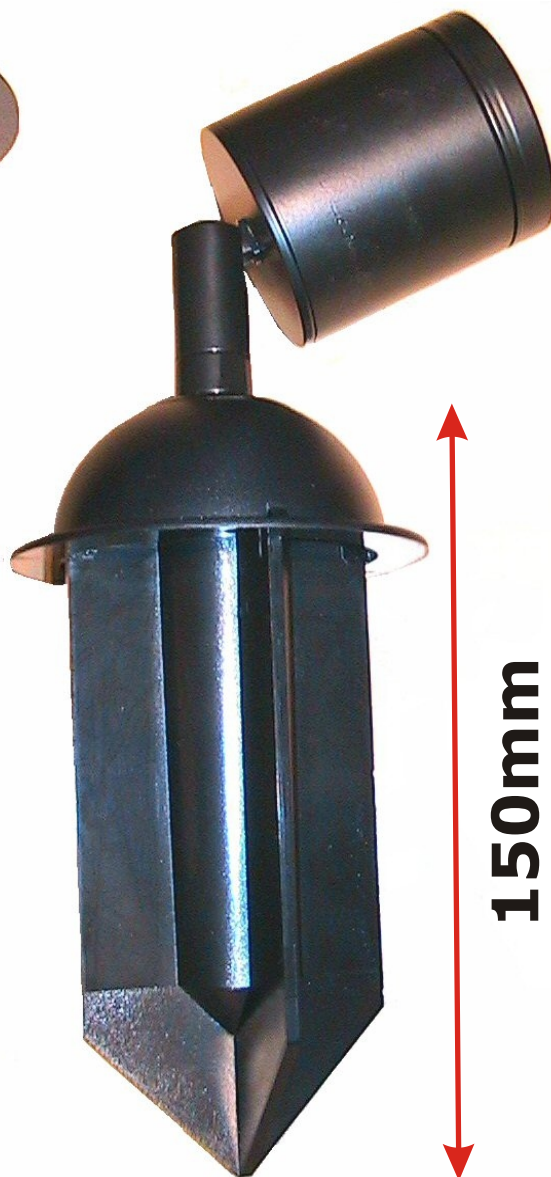

Standard Super Spike
