

L24 ALU PROFILE

DATA SHEET

L24 alu-profile – article number PE85.0003

Product description

Linear aluminum profile for concealed installation in walls and ceilings

The profile L24 is a LED recessed profile made from high-grade aluminum, in which a maximum of 2 Led Strips with 8-10 mm width can be installed.

If the distance of the LED chips <15 mm, creates a homogeneously illuminated line (without visible points).

The frosted cover made of polycarbonate (PC) is weathering and UV-resistant and flame-retardant.

Through the end caps made of polypropylene (PP), the profile is additionally sealed.

Due to the possibility of installing two LED strips in the profile it can be used as a primary energy-efficient light source.

Mounting

The quick and easy assembly of L24 Profile's in the slots provided the drywall is done using a mounting adhesive.

Stick the painter fleece with a thin layer of glue on the collar edge of the profile and a filling after drying (It.

Manufacturer's instructions), fill in and recoating with wall color.

So you get a clear-cut line of light without visible aluminum elements.

Accessories

Frosted cover PE85.0004

End cap PE85.0005

Technical specification

Power Led Strip:	max. 30 W/m
Available lengths	2m (other lengths on request)
Material	body – aluminum, Cover – polycarbonate (PC), End cap – polypropylene (PP)
