

Lumiere XXL+XXS, ceiling design Rodolfo Dordoni 2010

FOSCARINI

The ceiling lamp Lumiere XXL and XXS characterise the space with its own dynamism, thanks to essential and brand new geometries, created with the expert craftsmanship of master glassmakers. Their movement is created by their strong lines and by the orientation of the upper surface of the diffuser, which lies oblique to the surface it rests on, as the result of a cut that sections the glass in a surprising and original way. By using multiple versions of the two dimensions or simply orientating the glass in a different way you can create an interplay of

balance and lively compositions.

Lumiere XXL+XXS, ceiling technical info

FOSCARINI
