instructions for use

1. Unscrew light housing off the ground spike.
2. Insert light bulb.
3. Screw light housing on and pay attention to density.
4. Attach ground spike in the ground and look after a secure stand.
5. Conduct electrical junction by safety plug.
6. Fix mains cable between round blanks in the ground spike.
7. Power outlets have to correspond to the essential protection class.

light technology:

tungsten halogen lamp
QPAR51 no cool beam
50W/GZ10

EEC

technical information:

operating voltage 230V / 50Hz

protection class

safety class 1

Luminaire is suitable for mounting on normal inflammable fixing surfaces.

conformity mark

relamping and maintenance:

Disconnect the electrical installation.

Change lamp. Check the gaskets and if necessary clean or replace it.

Take notice of care-instructions when cleaning the luminaire.

For cleaning do not use a high pressure cleaner.

care:

Regularly clean luminaire from dirt and deposits.

See service documents:

Head: Care of anodized aluminium.

Pole: Care of stainless steel rustless.

safety:

We point out that the electric connection of light fixtures has to be done by a certified installer.

We assume no accountability for damages which are a result of non-appropriate mounting or application of the luminaire.

Modifications on the luminaire will result in loss of warranty.

The safety plug signals the changeable location of the luminaire. Please note, that a fixed installation and/or a connection with an earth-joint is not provided.

Attention: Please note that some parts of this luminaire can produce temperatures higher than 90°C when it is in operation. To prevent burns, please avoid any contact!

Please keep the instructions with the service documents!
