MATERIALS:

aluminium, steel

DESCRIPTION:

Using Led technology, the attention must be focused not only on energy consumption and light efficiency, but above all on the quality and quantity of the distribution of the light. In fact the advantage of the Led is that it emits 100% light fl ow into the direct hemisphere, eliminating dispersion and waste in other directions.This means that in order to obtain illuminance of 1250 lux on the work surface, with an incandescent light source a power of 100W is necessary, while with a Led source 10W is suffi cient, with a 90% energy saving. Base and cantilevered arms in polished aluminium; diffuser in matt anodised aluminum; joints and supports in polished aluminium. System of spring balancing. 5 direct Led. The code refers to the luminaire's body only

Interchangeable support: table base, clamp, desk fixed support and twin support that allows two indipendent lamp units to be fitted.
