

11 „Centre oú“ lighting object

Designer: Horst Lettenmayer, Thomas Schrade

Power LED

Art objects need to find their own place in a room. Therefore, art needs special lighting. The role of this lighting is to place emphasis on the art from the beholder's viewpoint. Art does not follow the light but rather light follows the art. Sculptures or paintings create the room through their structure, colour and surface. Their effect is enhanced by this light statue ranging from dim candlelight to that of a floodlight. Harmony of art and light in perfection.

Technical information:

Material:	Brass
Illuminant:	LED
Illuminant Lifetime:	50000 H.
Lumen:	2700
CLI:	80
Luminous colour:	warm 3000 Kelvin
Voltage Primarily:	220V - 240V
Voltage Secondary:	DC 24V / 6W
Metal tube:	rotatable Ø 18 mm

Version	Colour	Article No.
Power LED 3050K 21 Watt	Nickel	11N001LD21

Height: 950 mm

Socket measurements:

Length: 100 mm

Width: 100 mm

Height: 50 mm
