CONTENTS

- A - Wall lamp
- B - Wall bracket
- C - 2 x screws for assembly of lamp onto wall bracket
- D - Flat head screwdriver
- E - Transformer with interchangeable plugs

Please read these instructions carefully and retain them for future reference to ensure that the product is correctly installed should it be moved or sold. For your own safety, please study each step of this instruction manual before you commence installation. &tradition are not responsible for any faults or damages caused by not following these instructions correctly. Do not modify this product in any way.

TOOLS NEEDED

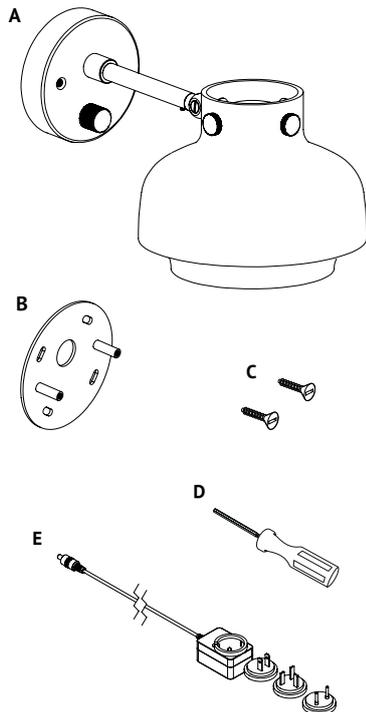

- Correct screws and plugs for the specific wall type where this lamp is to be installed.
- Electric drill
- Screwdriver
- Spirit-level
- Flat head screwdriver (supplied)

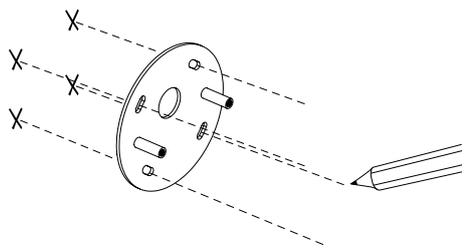

SAFETY PRECAUTIONS

- Dispose of plastic bag from packaging and do not allow children to play with it.
- Keep product well out of children's reach.
- The product is only intended for interior use.
- Do not attempt installation of product if you are not competent to do so yourself.
- Consult a professionally qualified electrician if in any doubt.

CLEANING INSTRUCTIONS

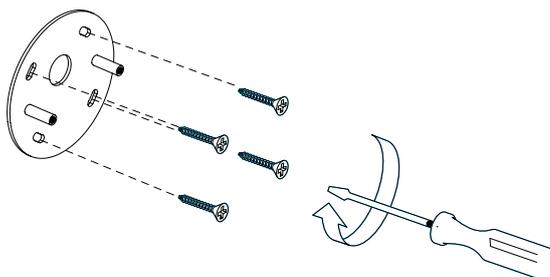

- Wipe surface of lamp shade with a soft, dry sponge or cloth.
- Do not use any abrasive cleaning tools such as steel wool, scouring sponges or stiff brushes.
- Never use strong cleaning agents such as white spirit, turpentine, household glass cleaner or cellulose thinners.

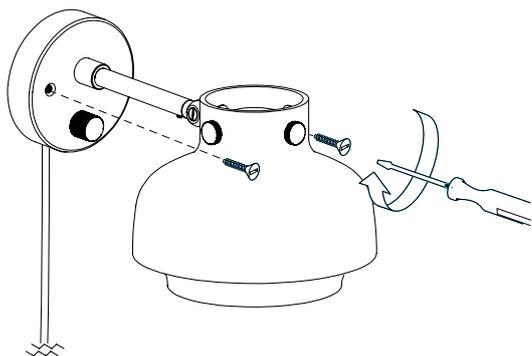

STEP 1

Ensure the power cord can be connected so it is not over-stretched or an obstacle. Place the wall bracket on top of a spirit level in the desired location for the lamp. Ensure the bracket is level and mark the placement of the holes with a pencil.

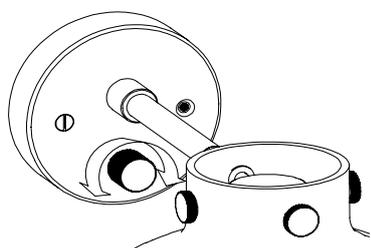

STEP 2

Drill the holes for the bracket and use the correct type of screw and plug for the type of wall, which the lamp is to be fitted to. Tighten the screws and ensure the bracket is safely fixed in place.

STEP 3

Place the lamp over the wall bracket. Align the screw holes of the lamp with the bracket and tighten the screws with the supplied screw driver.

STEP 4

Connect the cable to the transformer and insert the relevant plug for your region. Once the lamp is firmly in place it is ready to be plugged in. Adjust the light intensity to desired level by turning the dimmer on the base.

100-240V - 50 Hz
