Cleaning of lamps

For cleaning of your lamps, we recommend you only to use lukewarm water, maybe adding a bit of dish soap to the water, and to use a soft cloth for cleaning and drying. Do not use window cleaner or the like.

It is of utmost importance that you do not rub too much when you clean the glass shades.

Do not let it soak in water or other liquids.

If you have bought glasses with metallic paint, please note that also those parts must be cleaned as described above.
