

CARE & MAINTENANCE

BRASS

As time passes by, it is possible that the brass finish may evolve over time, influenced by conditions of humidity, the weather or careless operation or handling of the product.

To maintain its original appearance, it is recommended to only use a soft dry cloth for daily cleaning. For occasional and intensive cleaning, use clean water. Please, do not use any aggressive cleaning detergents or solvents containing strong chemicals, as this will permanently damage the brass surface.

Please be aware that when installing the product each component is placed on a soft surface and in no case may collide against each other.

ALUMINIUM – METAL – SILICONE

Wipe off dust with dry cloth. If necessary use a soft cloth wrong in lukewarm & clean water. Always dry immediately after cleaning with a soft dry cloth.

Please, do not use any aggressive cleaning detergents or solvents containing strong chemicals, as this will permanently damage the surface.
