

FLUTED GLASS TUBES:	682
CANOPY:	powder-coated mild steel 960mm x 2mm (38" x 0.08") colour to be determined by client
LAMPING:	25W, 24V LED 2700k, fully dimmable
DROP OF CHANDELIER:	determined by client
INSTALLATION:	can be carried out by George Singer or instructions can be provided
MATERIALS:	borosilicate glass and mild steel
WEIGHT:	approximately 25kg (55lbs)

#### DESCRIPTION

682 hand-made fluted glass tubes to be suspended from powder-coated mild steel canopy via 0.2mm-thick stainless steel, nylon-coated wires.

The central light source consists of LED tape adhered to square-section aluminium heatsink. Capped top and bottom with stainless steel.

#### NOTES

The ceiling canopy can be flush to the ceiling providing a 920mm-diameter hole is cut.  
Alternatively the canopy can be fitted with a 10mm shadow gap.
