WCM Wired module button legend options

To accommodate many commonly encountered programming situations Rako offers a number of WCM module options with button legends to suit these applications.

Standard variants are given opposite although custom etched legends are available at extra cost and extended lead times.

Standard scene control

WCM070
4 Scene, Off
Raise/Lower

WCM100
7 Scene, Off
Raise/Lower

WCM101
4 Scene, Off Raise/Lower
+ Blind Control

On Off Options

WCM020
On Off control

WCM040
On Off, Raise/Lower

WCM041
On Off control x 2

Curtain & Blind

WCM030
Blind Control

WCM060
Blind control x 2

WCM071
Blind Control of
up to 8 Blinds

Room Offset

WCM103
4 Scene, Off x 2

WCM

A WCM module is fully configurable during programming. Whilst this gives complete control to the programmer, many situations will want to follow standard programming formats for consistency and clarity.

To facilitate the use of button layouts common with WCM modules, button layouts are available as separate order items and can be easily changed on WCM modules.

Separate order button part codes are given opposite.

| WCM Equivalent legend	-	Separate order button part code
WCM070	→	BW0070
WCM100	→	BW0100
WCM101	→	BW0101
WCM020	→	BW0020
WCM040	→	BW0040
WCM041	→	BW0041
WCM030	→	BW0030
WCM060	→	BW0060
WCM071	→	BW0071
WCM103	→	BW0103

How to fit replacement buttons

Prise apart 4 clips to release button pads
