INSTALLATION INSTRUCTIONS

First things first...

- Make sure that the power is switched **OFF** before beginning the installation
- Installation must be carried out by a qualified electrician
- For lamp replacment & maintenance follow the steps in reverse
- Make sure the frame and light engine are securely installed before switching on the power supply

1.

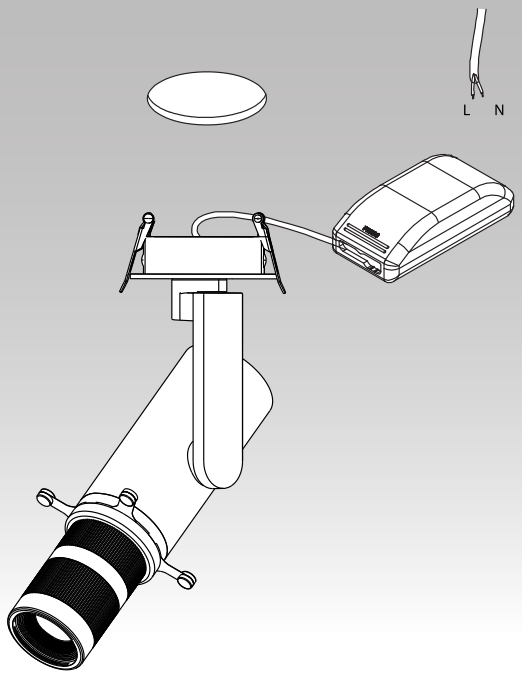

55mm [Frame]
75mm [Frame Plus]

Cut a hole into the plasterboard:
Ø55mm for Frame
Ø75mm for Frame Plus

Minimum depth of plasterboard: 2mm
Maximum depth of plasterboard: 30mm

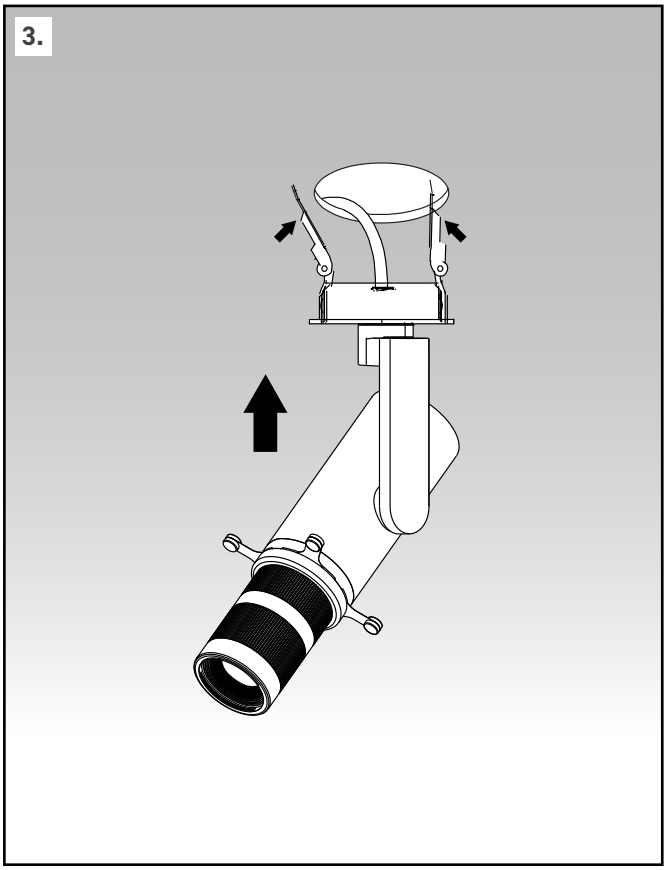

2.

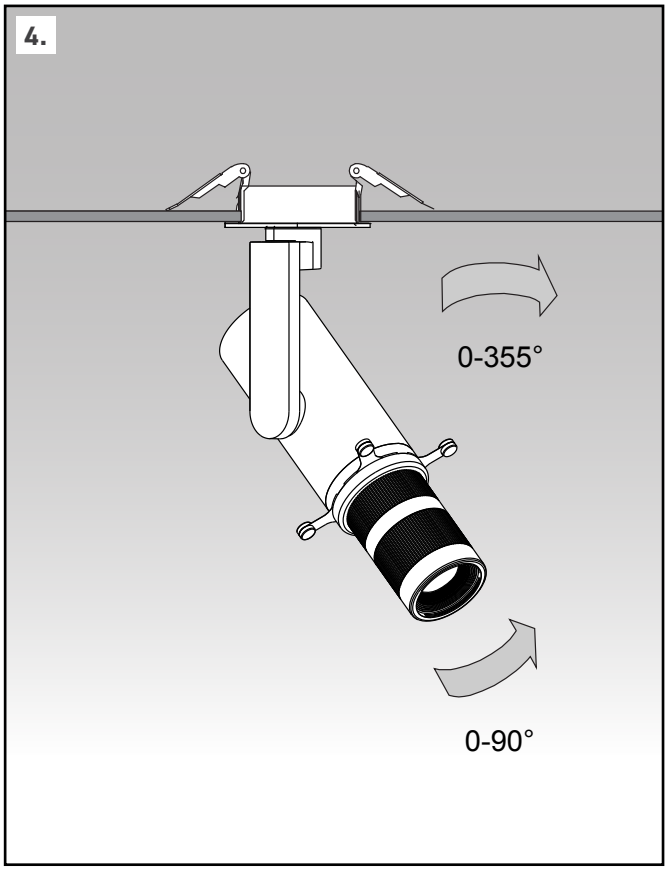

Connect the remote driver to the fitting and to the power supply.

DISCLAIMER

1. The lenses are made of optical glasses - to avoid damage please handle with care.

2. Do not disassemble other parts of the lens except for replacing the projection device and routine lens maintenance. Doing so will invalidate the warranty.

3. The weight of the entire lamp is around 1.40kg, ensure that the installation position bears enough weight and the installation environment is safe and reliable.

4. The lens does not include any repair accessories. Do not disassemble the lens, doing so will invalidate the warranty.

5. Please ensure the focus lens (Fig. 8) is tightened to avoid locking of lens.
